

**Project Category: Application Security, Course Designing, Technical Public Speaking, Educational Syllabus Designing**

|                   |  |
|-------------------|--|
| Project Name      | NIT M.Tech Cybersecurity Application security course and syllabus designing and implementation   |
| Client Name       | National Institute of Technology, Rourkela   |
| Industry          | Academics and Education  |
| Challenges (Work) | The main challenge is to design and implement Application Security Modules for their online cybersecurity degree certification program.  |
| Type              | Application Security, Education  |
| Project Duration  | 1 Month  |
| Outcome           | Our team conducted a meeting with the NIT staff and discussed how we can help them in Application Security. After this, we designed a perfect module and then released a short E-book of 50 to 70 pages specific to that module. It contains real world challenges and a little bit of theory. So they're happy with it. |
