

**Project Category: Network Administration, System/Server Administration, Network Security, Security Monitoring**

Project Name	Windows Server 2019 Licence Issue
Client Name	Individual Client in paraguay (Confidential)
Industry	Information Technology and Services
Challenges (Work)	Clients reached out to us because they have already multiple RDS CAL licences to use multiple remote desktop connections at once for their Windows server 2019 OS. But they cannot start or implement it. So the challenge is to fix this issue.
Type	Network Security, IT Support & Solutions, Remote Desktop , System and Network Administration
Project Duration	1 Day
Outcome	Our team found that clients have the licences but all the licences for RDS CAL did not work. Because of Server Group Policy. So we corrected the problem in Group policy and Allows from the Policy to use multiple RDS CAL License at once.
