

**Project Category: Web Application Security, Penetration Testing, Blockchain**

Project Name	Website PenetrationTesting (WAPT)
Client Name	Golteum.io
Industry	Blockchain & Cryptocurrency
Challenges (Work)	The client reached out to us because they have developed a cryptocurrency and blockchain platform and want to check for vulnerabilities. So they hired us to do this task.
Type	Web App Penetration Testing, Vulnerability Assessment & Penetration Testing
Project Duration	10 Days
Outcome	Our expert team performed a thorough security audit and found high risk vulnerabilities and fixed them. Along with it, we also provided a document which contains all information about penetration testing along with the remediation.
